

Idea IntelliJ

Python

Actions on Save （保存自动执行）

1. 安装插件 [file-watchers](#)
2. Preference > Tools > File Watchers > +
3. 添加新记录, Advanced Options 下的选项都取消选中

4.

```
1 # black 配置
2
3 File Type: Python
4 Scope: Project Files
5 Program: $PyInterpreterDirectory$/python
6 Arguments: -m black --skip-string-normalization --line-length 120 $FilePath$
7 Output paths to refresh: $FilePath$
8 Working directory: $ProjectFileDir$
```

4.

```
1 # flake8 配置
2
3 File Type: Python
4 Scope: Project Files
5 Program: $PyInterpreterDirectory$/python
6 Arguments: -m flake8 --max-line-length=120 --exclude venv,migrations $FilePath$
7 Output paths to refresh: $FilePath$
8 Working directory: $ProjectFileDir$
```

External Tools

1. Preference > Tools > External Tools > +
2.

```
1 # flake8 配置
2
3 Program: $PyInterpreterDirectory$/python
4 Arguments: -m flake8 --max-line-length=120 --exclude venv,migrations $FilePath$
5 Working directory: $ProjectFileDir$
```

3.

```
1 # black 配置
2
```

```
3 Program: $PyInterpreterDirectory$/python
4 Arguments: -m black --skip-string-normalization --line-length 120 $FilePath$
5 Working directory: $ProjectFileDir$
```
